\$15,995

PORTABLE, NON-INTRUSIVE

The only technology that accurately captures in-game and practice data indoors and outdoors

YOU OWN THE DATA

FlightScope Cloud provides data visualization and tables to facilitate player development and recruiting

VIDEO INTEGRATION

Action video clips are automatically created from any camera source and uploaded to FlightScope Cloud for review with session data

Patented FlightScope Fusion Tracking is an innovative combination of 3D Doppler tracking and synchronized image processing. It is a world first, providing users with accurate and consistent data for every pitch and hit.

FlightScope Cloud

An advanced cloud solution for all of your baseball data and video storage. Collect, analyze, and compare game and practice data in one, easy-to-navigate portal.

FlightScope Video Clipper included with FlightScope Cloud:

- Automatically record and clip video with data for review on one screen
- Customize your video clips with pre and post action triggers
- Multi-camera capability to review video from different angles

Pricing available in the Continental U.S. only
