

Performance data  
you can trust.

#### What's included:

- X3B radar unit
- Robust PC
- FlightScope software
- Professional Leica laser measuring device
- Heavy-duty tripod
- FlightScope backpack
- FlightScope hardside rolling case

**\$15,995**

**FlightScope X3B** utilizes our patented Fusion Tracking technology and is the only portable in-game tracking system that allows users to measure both pitching and hitting data.

#### PORTABLE, NON-INTRUSIVE

The only technology that accurately captures in-game and practice data indoors and outdoors

#### YOU OWN THE DATA

FlightScope Cloud provides data visualization and tables to facilitate player development and recruiting

#### VIDEO INTEGRATION

Action video clips are automatically created from any camera source and uploaded to FlightScope Cloud for review with session data

**Patented FlightScope Fusion Tracking** is an innovative combination of 3D Doppler tracking and synchronized image processing. It is a world first, providing users with accurate and consistent data for every pitch and hit.

## FlightScope Cloud

Get the world's most advanced cloud solution for all of your softball data. Collect, analyze, and compare game and practice data in one, easy-to-navigate portal.

#### FlightScope Video Clipper included with FlightScope Cloud:

- Automatically record and clip video with data for review on one screen
- Customize your video clips with pre and post action triggers
- Multi-camera capability to review video from different angles

Pricing available in the Continental U.S. only
